Select and copy multiple lines on a drawing. Create intelligent cut and copy rules for automatic design changes based on dynamic line properties. Duplicate or mirror drawings automatically. Create identical copies of a drawing in less than two minutes. Create mirrored and mirrored mirrored designs. Change the mirrored copy's scale and rotation for design changes. (video: 1:36 min.) Keyboard Shortcuts: Migration to AutoCAD 2019: Simplify navigation and workflows and save time with the new, interactive ribbon and new mouse shortcuts. Easily navigate drawings and model space, and more easily switch between orthogonal and axonometric views. Save time using ribbon shortcuts to interact with common drawing commands. For example, for "D" command, press F2, type "I" to toggle the trace options, or for "S" command, press F2, type "I" to toggle the linetype options. Save time with shortcuts for each command and type a shortcut command for commands that you frequently use. For more information about the migration to AutoCAD 2019, click here. New Task-Based Navigation Simplify navigation by moving from a task to a task. The Navigation panel has been redesigned to support creating a dynamic interface for your design workflow. Follow tasks across drawings. Have a drawing open in one application and a task in a different application, such as a file in Excel. Organize tasks by drawing. Work on many related drawings and organize your tasks in one place. For more information about task-based navigation, click here. Orthogonal and Axonometric Views Simplify orthogonal and axonometric views. With the new orthogonal view toolbar, easily switch between orthogonal and axonometric views. Orthogonal view toolbar.
